

A Perfect Partner for Hotel Business

PRODUCT BROCHURE

All-in-one Hotel Software Solution Provider

A hotel management system you definitely
need for your hotel.

What do you get in the
Hotel Management System?

Reservation System

With reservation system a property can create bookings, hold rooms, generate invoices and vouchers and can download all the booking history in an excel sheet.

Complete Rate Control

Our Hotel Management System allows properties to create multiple room categories with different room rates, meal plans and room occupancy status.

Inventory Manager

Inventory Manager allows the properties to allocate products and services to rooms and also to manage the fridge stock.

Accounting Solution

It can maintain their balance sheet, profit and loss sheet and more. And also generate invoices and payment receipt.

Point of Sales

With Point of sales a property can create records for off-room booking activities like room service, spa, jacuzzi, florist & much more.

Employee Activity Tracker

With the Employee Activity tracker the hotel's senior management can track the activities of their employees like sales, billing, housekeeping etc.

Let us understand what is a hotel management system?

A hotel management system is a comprehensive system that automates all operation of a hotel such as front office operations, reservations, housekeeping to billing and payments. Besides, it contributes to increasing a hotel's revenue and business. Be it a stand-alone or hotel group, a hotel management system can manage each and everything to the max.

Daily Operations

The cloud based hotel software handles your daily online and offline bookings with front office. Easy to manage your daily operations.
